i34- ESL emulator

For Ford cars

Models equipped with: CD4 platform, LIN, ESL with 3 wires, ESL no. AV6N-3F880 KA:
Mondeo V, S-Max II, Galaxy III 2015-2022

Emulator cable markings

red	+12V ACC
blue	GND
green	CODE

emulator LED indication

green	Emulator power supply
red	emulator work - ESL simulation

Due to the fact that the voltage to the ESL is applied only for a short moment, after the ignition is turned on, the diodes in the emulator also light up only for a moment.

The emulator automatically adapts to the car. The car can be started immediately after installation. No adaptation required. The disconnected ESL must be removed. If the emulator does not work, the errors in the keyless module must be cleared. The failure message on the dashboard will clear after some time.

Installing the emulator for car installation:
